

INDUSTRY LEADING BILLET STEEL SLIP YOKES & ALLOY COUPLING FLANGES

Driveline Services Australia - the underbody & power transmission specialists is pleased to announce that we now stock USA quality 1350 Series high performance chrome moly slip yokes and billet 60/61 T6 alloy coupling adaptor flanges.

Forged & Precision Machined:

1350 Series slip yokes are forged from chromoly (Chromium-Molybdenum steel) for superior strength and durability, and undergo a precision machining process to guarantee exceptional balance and minimal runout.

100% Leak Tested:

No need to worry about leaks. The seal plug is O.D. ground for a superior seal, and all slip yokes are air tested to 40 PSI.

Made in the USA:

Manufactured with ISO-9001 accreditation, and with our suppliers team of skilled engineers and craftsmen overseeing the production process from start to finish, this ensures every yoke is made to the exacting standards you demand.

Available for:

Part Number	Application
