

PUT YOUR MAINTENANCE ON ICE

Driveline Services Australia is proud to offer a **cryogenic treatment** service for wearing and high stress components. As an optional aftermarket treatment, available on request, on almost all of our vast inventory of proven underbody and power transmission parts, cryogenic treatments add a new dimension of strength and service life to wearing and high stress driveline components.

Extend the service intervals of your driveline parts today... **ask us for a cryogenic treatment quote now.**

- **Enhances resistance to wear**
- **Reduces chances of chipping**
- **Increases component life**
- **Complete cross sectional treatment**
