

ROAD TRANSPORT SERVICES

Few industries are more governed by time than the road transport industry. Every load, every delivery, every day is driven by the clock, with no time allowed for stoppages. As the underbody & power transmission specialists, *Driveline's* road transport tailshaft and chassis modifications services are quick, reliable and economical.

With millions of dollars of driveshaft stock on-shelf and ready to go, plus a state-of-the-art national network of nine branches Australia wide, *Driveline* can replace, repair, modify and balance anything from a full multi-piece shaft to single universal joints on vehicles from light rigid commercials to the biggest prime movers and haulers on the planet.

- ✓ **Tailshaft design, modification, manufacture and repair**
- ✓ **Truck, bus and machinery**
- ✓ **Single or multiple shaft systems**
- ✓ **Complete range of driveshaft part including universal joints, slip & diff yokes, centre bearings**
- ✓ **Plus one of Australia's most comprehensive ranges of underbody components**

**An example of a recent Driveline Interaxle multiple truck shaft design & build.
The shaft (pictured above) is an 1810 series Spicer.**
