IMPORTANT: * Durashock recommend the use of shortened bumpstop part no. N92347. When lowering any Commodore with IRS, we recommend 2 OFF camber and toe adjustment kits 23.180100K (alternative p/n 23.180100KS comes with removal tool)													
Caution: Check driveshaft end float after installation of 2 - 23.180100K. For super low applications, use 1 OFF X62946													
When replacing Commodore standard front top bearing assemblies with urethane alternatives, vehicle ride height can increase up to 20mm													

Note: Leaf springs made to order													
Variable Rate Coils are shown in BOLD ITALICS
