YOU!

CAN'T FIND WHAT YOU ARE LOOKING FOR?

New parts and assemblies for the GUN are being sourced, developed and added to our catalogue all the time. If you can't find what you are looking for give Driveline's LV Team a call and we will find it for you: (07) 3275 7666.

STEERING & SUSPENSION

DURASHOCK

SUSPENSION SYSTEMS

PROVEN IN SOME OF THE HARSHTEST CONDITIONS ON THE PLANET

Featuring tough twin-tube designs, precision engineered 18mm hardened chrome piston rods and heat resistant triple lip seals, Durashock Suspension Systems' range of gas-charged high performance 4WD performance shock absorbers deliver improved control, dynamic handling and greater comfort on every surface.

Temperature resistant triple lip gas seal maintains an airtight seal on the piston rod and ensures nitrogen stays in and contaminants stay out

Inbuilt hydraulic stop reduces 'top out' damage

Hard-wearing baked enamel finish stops rust and corrosion and looks great!

Tough as nails precision engineered 18mm hardened chrome, high-sheen, long-travel piston rod. Strong enough to lift extreme loads over the roughest terrain, long enough to handle serious articulation, smooth enough to provide an abrasion free airtight seal

Premium dampener oil enhances performance and increases the shock's resistance to heat and aeration, minimising fade and maximising durability.

High temperature nitrile black rubber (NBR) seals increase pressure chamber integrity, enhance shock response and reduce heat transfer

Up to 2.5mm outer tube wall (almost twice as thick as regular tubes) Increases strength and durability and protects from almost everything a tyre can throw at it.

Tough twin tube design increases performance and virtually eliminates aeration while protecting the shock's inner 'heart'

Nitrogen gas for sharp, responsive performance and almost no fade or cavitation

Custom 36mm big bore piston with teflon seals minimises valve lag when the going gets tough. The multi-stage, velocity sensitive action actively matches oil flow to the conditions, improving handling, comfort, and control

End mounted multi-stage compression valves control oil transfer and smooth road imperfections

Super tough high-performance rubber bushes reduce road noise, and provide a smoother, sharper ride
