PERFORMANCE BRAKE UPGRADES

PART NUMBER	DESCRIPTION	YEAR
45 050 2	HANDBRAKE RELOCATION - BRAKE ON THE TRANSMISSION KIT	VDJ7# 9/16 on

GENERATION II HARSH ENV. HANDBRAKE KIT
 SUITS ALL V8 LANDCRUISER FROM 09/16-ON

Beat mud, abrasives and mine grime with Driveline's New Generation II Harsh Environment Handbrake Replacement Kit.

- 16% larger brakes*
- NEW ball ramp design*
- Improved brake actuation*
- Improved ground clearance*
- Improved braking force*
- Eliminates handbrake shudder*

*Compared to the Gen I Kit

HOLDS... LIKE NO TOMORROW

Features

- A transmission mounted disc brake
- Complete kit ready to bolt in kit
- Uses OE handbrake lever and cable
- No vehicle modifications required
- One-piece rotor design

Call Driveline now for price and availability

LANDCRUISER CV JOINTS

SUITS 70 SERIES WITH FREEWHEELING HUBS
 SUITS 80 SERIES CONSTANT 4WD (UP TO APRIL 1994)
 SUITS 100 SERIES WITH FREEWHEELING HUBS

- 86.TL271 - Standard Joint
- 86.TL271G - Greasable Joint
- 86.TL271HD-G - Heavy Duty Greasable* (HDK Brand)

SUITS 100 SERIES CONSTANT 4WD

- 86.TL475 - Standard Joint
- 86.TL475G - Greasable Joint
- 86.TL475HDK.G - Heavy Duty Greasable* (HDK Brand)
- 86.TL475HD.G - Extra Heavy Duty Greasable*

*Can be used in mining applications where free wheeling hubs are removed & 100 series drive flange used so vehicle runs in constant 4WD.

STEERING & SUSPENSION

PROVEN IN SOME OF THE HARSHTEST CONDITIONS ON THE PLANET

DURASHOCK

SUSPENSION SYSTEMS

Featuring tough twin-tube designs, precision engineered 18mm hardened chrome piston rods and heat resistant triple lip seals, Durashock Suspension Systems' range of gas-charged high performance 4WD performance shock absorbers deliver improved control, dynamic handling and greater comfort on every surface.

Temperature resistant triple lip gas seal maintains an airtight seal on the piston rod and ensures nitrogen stays in and contaminants stay out

Inbuilt hydraulic stop reduces 'top out' damage

Hard-wearing baked enamel finish stops rust and corrosion and looks great!

Tough as nails precision engineered 18mm hardened chrome, high-sheen, long-travel piston rod. Strong enough to lift extreme loads over the roughest terrain, long enough to handle serious articulation, smooth enough to provide an abrasion free airtight seal

Premium dampener oil enhances performance and increases the shock's resistance to heat and aeration, minimising fade and maximising durability.

High temperature nitrile black rubber (NBR) seals increase pressure chamber integrity, enhance shock response and reduce heat transfer

Up to 2.5mm outer tube wall (almost twice as thick as regular tubes) Increases strength and durability and protects from almost everything a tyre can throw at it.

Tough twin tube design increases performance and virtually eliminates aeration while protecting the shock's inner 'heart'

Nitrogen gas for sharp, responsive performance and almost no fade or cavitation

Custom 36mm big bore piston with teflon seals minimises valve lag when the going gets tough. The multi-stage, velocity sensitive action actively matches oil flow to the conditions, improving handling, comfort, and control

End mounted multi-stage compression valves control oil transfer and smooth road imperfections

Super tough high-performance rubber bushes reduce road noise, and provide a smoother, sharper ride
